No. 5 YUCCA 'Color Guard'

Description

•Variegation of Leaf -

Creamy gold center, edged in green with curly white threads on leaf margins. In the cooler months the plant will have visible reddish overtones.

•Flowers - Creamy white flowers in summer months that last for several weeks. Can be 3-4 feet tall. About 3' in height by 2.5' wide.

Outdoor Growth

•Light - Full sun to light shade.

•Water - Low water needs, drought and heat tolerant.

Specimen product that will not form a trunk but will remain

compact and form extra shoots. Slow growing and really tolerant of difficult growing situations: snow, winter salt, cold, heat, dry conditions, high sun area.

•Soil - Well drained mix but a dry mix is best. pH is a bit acidic - 6.8+.

Application

•Sword-like foliage. Great as a focal point in a landscape planting. Can be used as a specimen in group or solitary plantings.

•Good plant for abused areas.

•USDA Zones 4 -10 Evergreen
