

KALANCHOE THYRSIFLORA

'Fantastic' PP21,945!

**It's hot, it's sexy, it's succulent,
it's 'Fantastic' PP21,945!**

Winner of both the 'Favorite New Foliage Plant' and 'Retailer's Choice Award' at the 2010 Tropical Plant Industry Exhibition (TPIE). 'Fantastic' is a succulent perennial with a compact form and beautiful variegation. Dramatic red edging intermixed with golden highlights, beginning at the leaf tip and flushing over the silvery-green, rounded leaves. (Many people ask if the red color is caused by cold temperatures, similar to other kalanchoes, but 'Fantastic' always has the red blush highlights.)

This easy to grow, robust, drought tolerant plant can grow up to 24" tall and 24" wide. A clumping fast grower, popular in rock gardens, perennial container gardens and patios. Planted in mass, it makes a 'Fantastic' display.

Care Instructions: Enjoys Full Sun and slightly dry conditions.

Kalanchoe 'Fantastic' PP21,945

is truly..FANTASTIC!
