

Foremost® Foliage

'DIOON SPINULOSUM' (*Giant Dioon*)

The attractive 'Dioon Spinulosum', also known as Giant Dioon, is the largest of the American cycads.

- Typically in landscapes the dioon ranges from 5'-12' making it the perfect specimen plant.
- This variety of cycad grows best in the South Florida limestone rich soil and being that it is of the Dioon family it is resistant to the Asian scale.
- With all of these grate attributes ForemostCo® has added it to our line of Cycads!
